AeroPac®

acoustic air ventilator

Whisper quiet to operate, AeroPac is the solution to improve interior air flow and quality when windows can't be opened due to noise and pollution.

It goes without saying that sound insulation is only one of AeroPac's outstanding characteristics. This small device that runs as quiet as a whisper, uses as little energy as a television in stand-by mode, is easy, fast and clean to retrofit and with its inconspicuous and contemporary design blends in well with all furnishings and in every room: whether it's a bedroom, children's room or living room. In noisy environments close to airports, rail corridors, freeways and high density road traffic, and with windows closed to keep noise and pollutants out, the AeroPac® acoustic ventilator will maintain a healthy interior environment.

AeroPac® provides a solution that is already well-proven in numerous large construction projects. The AeroPac® ventilator takes in outside air, removes engine emissions, absorbs airborne noise and silently provides a healthy supply of clean, fresh air.

Wall-Mounted Ventilator with Sound Absorption

Technical

- Dimensions 467mm high x 270mm wide x 132mm deep
- Weight 3.12kg
- Air movement is approximately 15-160 m³/hr for the Carbon Impregnated dust filter and Activated carbon filter
- Power consumption min 2 watt - max 30 watt
- Power supply 230/240V AC/50Hz 0.14amps
- Operating noise level 20dB(A) - max flow 30dB(A)
- Sound absorption with two open sliders $D_{n,e,w} = 50\text{dB}$; one open slider $D_{n,e,w} = 53\text{dB}$; all sliders closed $D_{n,e,w} = 57\text{dB}$
- PVC tube dimensions 80x500mm long
- Supplied filter type: Active Carbon Filter (non-washable) for exhaust fume odours.
- Optional filter type: Carbon impregnated Dust filter (washable) for pollen/fine dust
- Filter life: The carbon filter life is typically around 14-16 months, however it may be shorter in a heavily polluted environment.
- Warranty: 3 year warranty is given, subject to the correct installation and use of the product

Key benefits

- Provides wellbeing by letting you achieve a restful and peaceful sleep.
- Draught-free and super silent ventilator
- External noise is eliminated almost entirely.
- The new LCD display makes operation easy, from the infinitely variable air quantity control right up to the programmable timer
- Four different filters are available: coarse dust, active carbon, fine dust or pollen filter
